Dear Customer,

Founded in 2010, Bracke Manufacturing has progressively evolved and expanded by carefully listening to our customers' needs for interconnect solutions. Bracke Manufacturing has become a leading supplier of RF & Microwave components in less than a decade. This could not have been accomplished without the support of our loyal customers. This new catalog includes several hundred new items that have been designed, manufactured and delivered in record time. Our results have underscored the effectiveness of our vision and strategy, coupled with our strong execution. We have consistently delivered the commitments we have made; to our customers and our employees.

Our "on-demand" vast inventory allows us to same day ship and overnight ship most items in the catalog, with few exceptions. The latest catalog offers a vast array of high quality, standard and special RF and Microwave components, up to 65 GHz. As a result of our decades of successful experience in innovation, design and manufacturing, we are able to offer you an unparalleled breadth of RF and microwave products of the highest quality. We have accelerated our own speed of innovation to stay ahead of transitions and help our customers meet their current and future business goals.

Our ultramodern facility is located in Irvine, California, where we maintain our design, manufacturing and warehouse space. Our state of the art designs and technologies, coupled with our extensive off the shelf inventory, allows us to deliver products that meet all of your specifications within your project deadlines. As a solution-minded company we remain focused on bringing you the knowledge that you expect and the excellent customer service that you deserve.

Regardless of what you are in the market for today, the enclosed catalog is worth exploring. Our unique approach brings together a commitment to service; quality, selection & delivery that we believe is the key to our customer's success now and in the future. In our view, we are the only company in the industry that can deliver on this approach. Please take the opportunity to look at our catalog and let us know how we can be of service to you.

Best Regards,

Lawrence H. Pasternack
